FIFTEENTH SUPPLEMENT TO THE AMERICAN  
ORNITHOLOGISTS' UNION CHECK-LIST OF  
NORTH AMERICAN BIRDS.

THE Fourteenth Supplement to the Check-List was published in 'The Auk' for July, 1908 (XXV, pp. 343-399). The present Supplement gives the results of the Committee's work at its meetings held in Cambridge, Mass., November 16, 1908, and in Washington, April 13-17, 1909. At the Washington meeting all questions before it relating to the names and status of species, subspecies, and higher groups were disposed of in preparation for the new (third) edition of the Check-List, the manuscript for which is now nearly ready for the press. The present Supplement is therefore the final report of the Committee in relation to the preparation of the new Check-List.

It was finally decided, on the ground of convenience, to retain the order of arrangement of the higher groups (orders, suborders, families, etc.) followed in the former editions of the Check-List, for reasons more fully stated in the Preface to the new edition. It was also found desirable to omit the numeration of the species. It was further decided (in opposition to a former ruling of the Committee) to continue to use the possessive form, as heretofore, in vernacular names based on the names of persons.

The vernacular names employed in the Check-List were carefully scrutinized with a view to their modification in cases where names could be found that are more in accord with those in use where the birds live. A number of popular vernacular names were thus substituted for 'book names.' It was also decided to omit 'American' as a prefix, as being superfluous in a list of North American Birds. On the other hand, European birds, with the same vernacular names as their American representatives, are distinguished by the prefix 'European.'

The Fourteenth Supplement contained a list (*l. c.*, p. 399) of 16 generic cases that had been referred to the Nomenclature Commission of the International Zoölogical Congress for decision. Unfortunately the Committee has been disappointed in its expectation of obtaining a report from the Commission in time to incorporate its decisions in the new edition of the Check-List. In the

first 12 of these cases the names involved are allowed to stand as in the previous editions of the Check-List, with the exception of the case of *Chæmepelia*, which in the present Supplement (below, p. 300) is adopted in place of the untenable name *Columbigallina*. The last four names are the 'Swainsonian genera,' of late under controversy but now accepted in accordance with the law of priority.

The list of 'deferred cases' is now reduced to 12, 11 of which relate to the status of forms that have been described as species or subspecies, and one is a case of nomenclature. In each of these cases the Committee has been unable to secure material for their proper consideration.
